

# TETRION®

# Tetrion Technology Leads the Way

The Tetrion Brand has matured to become one of the most recognisable names within the professional trade market over the last 40+ years. At its launch in the early 1970's Tetrion changed the filler market with the innovation of the first 'All Purpose Filler'. This cutting edge product was launched on National Television and it quickly became the market leader.

Following the decades of success the tried and trusted Homecare range was rejuvenated in the early 2000's. The innovation of 'Microlite Technology' Tetrion Smart Filler, was a smash hit for Tetrion and was seen as the next big step in the Decorating Market on its launch in 2002.

15 years later Tetrion is being revamped once more, the range of well-loved classic products has been expanded with further development into new DIY technology.

With Fillers, Adhesives, Decorating Sundries and much more, Tetrion covers every aspect of modern household decorating. From its humble beginnings Tetrion is still winning praise from loyal customers; as well as attracting new trades people and DIY enthusiasts with its reputation as one of, if not the best homecare range on the market.

## Mix and Drying Times

	NAME	MIX RATIO	DRY TIME TO SAND	DRY TIME TO PAINT	UNDERCOAT?
POWDER	<b>All Purpose</b>	2.5 Powder to 1 Water	2 hours	24 hours	Yes – oil based if outside
	<b>Easy On Interior</b>	2 to Powder to 1 Water	140 mins	24 hours	No
	<b>Hard as Rock</b>	5 Powder to 1 Water	30 mins	1 hour	Yes

## All Purpose Filler

Tetrion All Purpose Filler is the same tried and trusted formulation which has been the "go to" for trade decorators and DIY enthusiasts for years. It's the ideal choice for projects where a versatile, multi surface filler is required. Specially designed to give a super smooth, polymer re-enforced, permanent finish for both indoor and outdoor applications.

Product	Case Qty	Size	Code
All Purpose Filler Powder	12	500g	TFP512
All Purpose Filler Powder	8	1.5kg	TFP015
All Purpose Filler Powder	6	3kg	TFP301
All Purpose Filler Powder	1	5kg	TFP050
All Purpose Filler Powder	1	10kg	TFP010

Remove loose material from area to be filled

Fill hole to just above that of surrounding area, smoothing off with a damp filling knife

# Powder Fillers

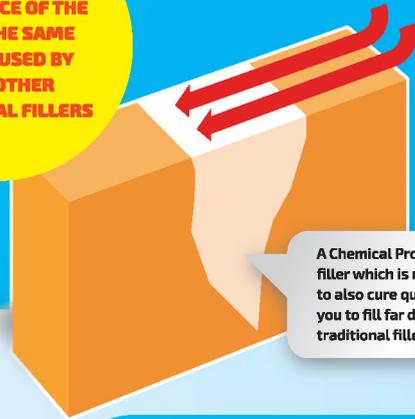

## Easy-On Interior Filler

Tetrion Easy-On Interior Filler is a high quality and high performance interior filler which makes plaster filling and jointing jobs as simple as possible. The special 'dual-action' formulation features air-drying and chemical setting characteristics allowing for deep fill applications whilst maintaining a super-smooth finish. Tetrion Easy-On cures effectively and provides a fine, easily sanded surface without the need for a separate 'finishing' filler.

Product	Case Qty	Size	Code
Easy On Interior Filler	12	500g	TMF500
Easy On Interior Filler	8	1.5kg	TMF015
Easy On Interior Filler	1	5kg	EAS050

**AIR FLOW DRIES THE SURFACE OF THE FILLER, THE SAME METHOD USED BY MANY OTHER TRADITIONAL FILLERS**

A Chemical Process causes the filler which is not exposed to air to also cure quickly. This allows you to fill far deeper gaps than a traditional filler would allow

## 'Hard as Rock' Filler

Tetrion 'Hard as Rock' Exterior Filler sets 5 times harder than concrete within one hour, making it the perfect choice for when your project needs a strong and reliable solution for any outdoor filling jobs. It can be mixed as a standard filler or as a pourable slurry, allowing for an easy application no matter the repair at hand. Its high strength makes it suitable for filling, fixing and even anchoring. As it is designed for outdoor use it is completely waterproof when dry and the formulation is guaranteed to not sag.

- Suitable for filling, fixing and anchoring.
- Completely waterproof.
- Easy to mix and use.
- Non-sagging formula.
- Rapid setting – sets 5 times harder than concrete within 1 hour.

**WEATHER-PROOF FORMULA**

### Flexi-Fill

**WATER RESISTANT**

Tetrion Flexi-fill Ready Mixed is a versatile and flexible high quality caulking compound. Suitable for use where limited movement is likely. Ideal for skirting, architraves, staircases, window frames, worktops etc.

- Seals & fills gaps in one
- For joints & cracks around window frames, doors etc

Product	Case Qty	Size	Code
Flexi-Fill Tube	12	330g	TFF330

# Ready Mixed Fillers

## Smart Filler

Tetrion Smart Filler is a super lightweight filler which is ideal for filling large holes or hairline cracks in one easy application. It will not shrink, crack or slump and is super smooth with little or no sanding required. Microlite technology ensures Smart Filler sets 10 times stronger than ordinary lightweight fillers, meaning you can nail or screw straight into the filler with no need for wall plugs or drilling. The fast-drying formula can be over-painted or wallpapered in 15 minutes and is suitable for use on a wide variety of substrates.

Microlite glass bubbles present in Smart Filler help to keep the filler weight at an absolute minimum. The high strength nature of these glass bubbles means that Smart Filler can easily compete with traditional fillers when it comes to drilling, screwing and tapping.

Product	Case Qty	Size	Code
Smart Filler Pot	6	1L	TST001

- FAST SETTING**  
  
**OVERPAINT OR PAPER IN 15 MINUTES**

fill and seal cracks.  
Bonds to metal,  
wood, plastics, bricks  
and PVC.

MAKE GOOD WITH  
**TETRION**

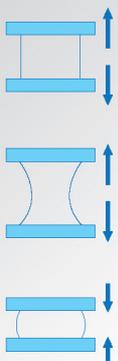

# Make Good

Tetrion 4 in 1 is a high performance, multi-purpose, professional quality sealant & adhesive which utilises Inert Polymer Technology. Patented technology ensures this one product is suitable for FOUR applications - sealing, gripping, filling and bonding. 4 in 1 is capable of outperforming conventional products, specific to their use, such as silicone sealants, butyl/acrylic sealants and butyl/acrylic adhesives, as well as conventional fillers.

- Seals showers
- Bonds to all metals
- Fills small holes & cracks
- Bonds all types of wood
- Brilliant white matt finish

Sealants can generally be classified as Low Modulus or High Modulus. Each has its own benefit and choosing the correct modulus for the application is important.

- When **4 in 1** is stretched it initially acts as a high modulus sealant requiring a greater force to pull it. This allows it to function as a high quality adhesive with amazing initial gripping properties.
- However once **4 in 1** starts to stretch it changes to a low modulus sealant requiring less force to pull it. This makes it suitable as a flexible sealant in areas where movement is expected.
- **4 in 1** will also shift from high to low modulus when an opposite, compressive force is applied.
- And once movement stops IPT reverts to a high modulus sealant. The memory and movement characteristic of **4 in 1** is Dynamic Modulus. This makes the choice of selecting a high modulus or low modulus sealant easy, you just use **4 in 1**.
- **4 in 1** is also capable of movement in 3 dimensions. Other flexible sealants are designed to be compressed, stretched and moved up/down. They will fail when a twisting movement is applied. IPT will not fail when twisted, meaning it will out perform traditional sealants in the most extreme applications.

4 in 1

4 in 1 (IPT)	12	330ml	IPT330

Primer Bonder

# Instant Primer Bonder

Tetrion Primer Bonder is a new-technology, multi-functional primer, sealing agent, key coat and bonding aid. Using Primer Bonder prior to decoration or surface treatment can make the difference between an amateur DIY-job and a professional finish!

- Bonds powdery, friable walls
- Stabilises poor surfaces
- Preparation before painting, decorating, sealing, tiling, grouting or filling

Product	Case Qty	Size	Code
Primer Bonder	6	1L	TPR001

**SANDED SURFACE**

**PRIMED SURFACE**

Even after sanding plaster and wood can still be rough and uneven. Applying **Primer Bonder** after sanding helps to form a smooth and sealed surface ready for painting to create a truly professional finish.

- PRIMES • BONDS
- SEALS • PROTECTS

## Make Good

Tetrion Fix a Leak is a rubberised coating which fills and seals fine leaks and cracks, it can also protect items and products from moisture and weathering. Tetrion Fix a Leak provides a tough, water tight, yet flexible seal which can stop leaks on certain substrates. This seal withstands movement, wide temperature changes and bright sunlight meaning it is the ideal solution to fix leaky pipes both indoor and out. The clear-drying and over-paintable finish ensures all fixed leaks are inconspicuous.

- Flexible liquid rubber
- Bonds to all types of metal, wood, plastic, brick, concrete, PVC
- Watertight finish, prevents leaking
- Can be overpainted

Product	Case Qty	Size	Code
Fix a Leak	6	400ml	TFL400

## Fix a Leak

## Seal and Waterproof

Tetrion Seal and Waterproof is a visco-elastic and abrasion resistant coating which gives effective protection and sealing power to flat roofing, metal panels and even vertical surfaces. It is thixotropic, meaning thick films can be quickly achieved. It gives excellent protection from water ingress and dampness. It cannot be overpainted.

- Exterior use only
- Black bitumen base
- Seals leaks instantly
- Prevents water ingress
- Doesn't run or sag

Product	Case Qty	Size	Code
Moisture Mate Absorber	6	400g	SMM004

### Wood Hardener

Tetrion Wood Hardener helps prevent the recurrence of wet rot problems. It also strengthens decayed and rotten wood by binding wood fibres together to provide a solid base for filling. Can be used in conjunction with Tetrion Woodfil.

Product	Case Qty	Size	Code
Wood Hardener	12	500ml	TWH500

### Wallpaper Stripper

Tetrion wallpaper stripper actively penetrates and dissolves wallpaper adhesive to strip paper fast. Apply generously and allow to soak for 10-30 minutes until paper becomes soft and easy to peel.

*"I have a scratch  
on my fridge,  
what can I use?"*

Working hand in hand with the T-Cut Tin, T-Cut Home Scratch Remover Pen not only improves the appearance of scratches but also protects paintwork from harsh weather conditions, rusting and oxidation all in one quick application. Perfect for using on painted metal surfaces & plastics around the home.

# Double TT

## For Home, Garden and Workshop

- Penetrates – loosens rusted parts
- Lubricates – stops squeaks, frees mechanisms and locks
- Protects – helps to prevent corrosion on metal surfaces

You can always find a use for Double TT. Capable of penetrating and easing corroding parts, fasteners, seized nuts and bolts, cables, linkages etc. Makes opening locks and hinges which require lubrication easy. Stops squeaks on springs, castors pedals, handles etc. Leaves a protective coating to help prevent rust. Suitable for use on many household items, especially useful for lubricating light machines such as sewing machines, engines, DIY tools or lawnmowers.

## Fuel Cans

Tetrosyl Fuel Cans are the safe and secure way to store fuel in your home or garage. Whilst most commonly associated with vehicles, petrol and diesel fuel is also used in products which never leave your property. Lawn mowers, hedge trimmers, chainsaws, garden machinery and generators require petrol or diesel to function. Tetrosyl has cans for both diesel and unleaded petrol – each one is colour-coded according to the type of fuel, again using the same colours seen on forecourts. All of the cans are made from high-density polyethylene (HDPE).

Product	Case Qty	Size	Code
Diesel Fuel Can - Black	10	5L	TPE005
Petrol Fuel Can - Red	10	5L	TPF005
Unleaded Petrol Fuel Can - Green	10	5L	TPH005
Bell Unleaded Petrol Fuel Can - Green	4	5L	PCR053
Bell Diesel Fuel Can - Black	4	5L	PCR054
Large Diesel Fuel Can - Black	5	10L	PCR031

## Funnels

Our range of hardwearing plastic funnels are ideal for use in decorating, household or even automotive jobs which require the transfer of powders, liquids or even fuel without spills. Available in a range of sizes each of the funnels has a narrow spout which fits easily into most bottle necks or containers.

Product	Case Qty	Size	Code
Standard Funnel	10	6.5"	TSF065

	12	150mm	STA179
Philips Screwdriver PH3	12	150mm	STA180
	12	200mm	STA181

Stag Slotted and Philips Head Screwdrivers are by far the most common tips used on screwdrivers. These are the screwdrivers almost everyone is familiar with, they will be found in most toolboxes.

Slotted

Philips

Stag Pozi Screwdrivers are most similar in appearance to Philips Screwdrivers, this is due to cross head appearance of pozi screws. The advantage of using the pozi design is that it allows higher torque application than philips.

Pozi

## Pozi Screwdrivers

Product	Case Qty	Size	Code
Pozi Screwdriver PZ0	12	75mm	STA183
Pozi Screwdriver PZ1	12	75mm	STA184

Stag Socket Sets offer a selection of sockets, handles, couplers and much more. Providing you with the most common and useful sockets without the hassle of purchasing all individual pieces.

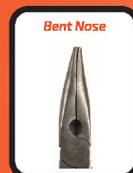

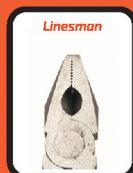

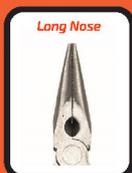

Stag pliers are all made with rubber handles for extra safety and comfort. The range includes a variety of heads and sizes.

- Long Nose - For better access and serrated jaws for superior grip
- Diagonal - Ideal for cutting copper, brass, aluminium and steel wire
- Linesman - Also known as combination pliers, ideal for gripping, twisting and bending
- Bent Nose - Handy for picking up small components and increasing accessibility when working in confined spaces
- Circlip - Contains different jaws that can be easily exchanged for internal and external work
- Crimping - For making secure electrical connections, or cutting/stripping wires
